The All-In-One Workspace Launcher for Mac

Stop wasting time reopening the same apps over and over. Lattix is your personal command centre, made purposefully for **coders, creators, traders**, and anyone who is struggling with **multiple workflows**. With just a single click, you can **launch apps, files, and URLs** into a

custom layout across single, dual, or triple monitors. It's the fastest way to turn your Mac into something that is focused strongly, no more searching, dragging, or switching users.

Workspaces That Open Exactly How You Want

Group your tools into named Workspaces, save **window size** and position, and trigger them instantly with **hotkeys** from the menu bar. Let it be **coding with Cursor, Terminal, Safari & Docker, designing in Figma & Slack,** or trading with **TradingView & Discord**, Lattix opens everything exactly where you expect it. Start saving time and mental energy in one click.
