

Sunny Smiles EP - Children Braces El Paso

Some kids get really excited to get new braces while others are worried about how it will change the way they look. [Children braces in El Paso](#) can help straighten your child's teeth and also make them smile just as cutely as they always did. If your kids don't have the perfect teeth then we at Sunny Smiles [dental clinic in El Paso](#) can help you give your child a smile that will be even better than before.

Sometimes teeth just don't grow evenly. They might be crooked, which causes the upper and lower jaws to become misaligned, leading to biting issues. It can be embarrassing for your child to have a misshaped mouth, something that can greatly affect their everyday life at school and sports. This issue can be resolved at Sunny Smiles where our orthodontists will recommend you [children braces in El Paso](#).

Our [Dental specialists in El Paso](#) will not give your child those old metallic braces that make the mouth look as if it is full of metal wires. Nowadays, [children braces in El Paso](#) have advanced and metal braces have been replaced with Invisalign braces that are hardly noticeable. These will be the same color as your child's teeth and won't make them feel out of place. They will still smile as beautifully as they always did and won't feel embarrassed in front of their friends at school. The wires used in Invisalign braces are used behind the teeth and are made with a material that helps in straightening the teeth much easier and faster.

Even though you should visit a dentist with your child on a regular basis, make sure that you visit an orthodontist when your kid turns 7. This is the age when a Sunny Smiles dental specialist will be able to inform you of any issues that may occur with your child. This is also the age when permanent teeth that are on the upper and lower jaw start to sprout. At this age your child's oral structure is still forming and it is easier for the orthodontist to take any measures in order to prevent any problems. They will also be able to ensure that the teeth are formed correctly or if any [children braces in El Paso](#) are required.

These days an increasing number of people are benefiting from [Invisalign braces in El Paso](#). They can get your teeth and jaws properly aligned so you can have a beautiful smile. Treating misaligned teeth is important because they can cause a number of problems such as gum disease, speech impairment, tooth decay, neck pains and difficulty chewing and swallowing. Apart from that Invisalign braces are also aesthetically pleasing as they are made of plastic, allowing you to smile your most beautiful smile.

Sunny Smiles EP - Kids Dental Care El Paso

Your [kids dental care in El Paso](#) should start early. Just because you can't see the teeth doesn't mean they are not there. On birth, your baby will already have 20 primary teeth but they would have not yet come out of the jaw. You can use an infant tooth brush to wipe on your baby's gums daily to keep them clean from any bacteria. However, you should visit Sunny Smile's [dental center in El Paso](#) so our professional dentists can better guide you in your kid's dental care.

Start Dental Care Early

When your kids are around 2 years old they will be able to spit properly. This is the age when you can use a small amount of toothpaste to clean their teeth. If they want to brush on their own, make sure that you supervise their brushing. Do this till they are 5 years old, it will help them learn the proper way of brushing their teeth.

Kids love to eat sweets, toffees and ice creams, there's no discouraging them. This is why it is important that you visit Sunny Smile's [El Paso dental care](#) regularly. Sometimes brushing your kid's teeth is not enough as there are always some food particles that are left behind between the teeth. These particles can be cleared by flossing and you need to teach your child the right way to do that.

Regular Dental Checkup for Your Kids

Even babies can develop tooth decay. A baby sleeping with a bottle in their mouth may seem harmless but the sugars from the milk or juice stick to the baby's gums and damage the enamel. This condition is called *bottle mouth* and can cause discolored and pitted teeth. It is always best to visit a [kids dental care in El Paso](#) to have your baby's gums and any new grown teeth regularly checked for such conditions.

Sunny Smile's [kids dental care in El Paso](#) helps parents and children understand the ways of keeping their teeth healthy. We specialize in children's dental care and are trained to solve any issues that may arise with your child's dental health. You won't find a friendlier and professional [kids' dental care in El Paso](#).

If you are serious about your children having healthy and beautiful teeth, then in addition to training them in the proper ways of dental hygiene, you also need to make sure that you take them to a good [kids dental care in El Paso](#). Sometimes just brushing and flossing is not enough, you will need professional help. This is why regular dental checkups with a pediatric dentist are so important for maintaining your child's oral health.

Sunny Smiles EP - Kids Orthodontics El Paso

There are many issues that may arise as your child grows. It can be a problem with their bite or the alignment of the teeth. This is where a [kids orthodontics in El Paso](#) comes in to save the day. Gone are the days when kids had to put on ugly metallic braces that would make them feel embarrassed to go to school and take part in sports; all that is history. At Sunny Smiles [kid's dentist in El Paso](#), we help you make the most of the latest dental technology.

A good dentist knows that it is easier to manipulate the teeth while a child is young. This is why when your kid turns 7; you need to take them to Sunny Smiles [kids orthodontics in El Paso](#). When you visit us we will do a thorough examination of your child's teeth and check for any misalignments or any other issues. Nowadays we use plastic-based materials that are efficient and aesthetically pleasing. Unlike the old-fashioned metal braces, these are more comfortable and can be removed so your child can brush and floss for better oral hygiene.

However, there are some rare cases when other more complicated methods need to be used. If that is the case then our Sunny Smiles [pediatric dentist in El Paso](#) will perform local anesthesia. Not to worry though, our dentists have years of experience and are trained oral surgeons certified to perform such procedures. During this time, parents tend to get confused whether to perform such a procedure or not, so make sure to ask us as many questions as possible so we can remove all your doubts.

It is always the best way to go by giving your child a good dental hygiene and early checkups with a [kids orthodontics in El Paso](#). Taking early care can prevent your child from having to undergo any major procedure. Encourage your kids to wear mouth guards during sports to avoid any injury to their teeth. As your kids grow, make sure that you take them on regular visits to Sunny Smiles [kids orthodontics in El Paso](#). Anywhere between once every 3 months to once every 6 months is ideal. This way if there are any chances of your child developing misaligned teeth, a proper procedure will be recommended to nip it in the bud.
